The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Matsumoto (US 6307638). Note "multi-value conversion" (convert a multivalue image signal, see abstract), "binarizing step of converting" (mode to binarize, see abstract) and "selection step of selecting either one of said multi-value conversion step and said binarizing step" (see lines 7-20 of column 11), "in accordance with a condition" (character or photograph, see s1302 and s1305) as claimed in claim 1 of the application and taught by Matsumoto.
